**NEW!**

# DUO

knows your  
**depth.**

The first cordless drill and plasterboard screwdriver with an accurate depth stop. Another Festool first!

The 12 Volt C 12 DUO with *EC-TEC*<sup>®</sup> brushless motor combines a super-efficient, extra long-life cordless drill with an accurate depth stop. Integral clutch system maintains the preset fastening depth. Remove screws without changing the depth setting. Perfect for plasterboard! The depth stop fits the C 12 DUO and all other Festool cordless drills with a Fastfix chuck.

Our demonstrators don't go anywhere without their MFTs! For cutting, routing, sanding, - most everything, the MFT is the perfect work surface and gives you unlimited ways of supporting and clamping your work.

## multifunction table MFT

- integrated guide rail for perfectly straight cuts every time
- fold-away legs for easy transport
- integrated aluminium frame for clamping workpieces vertically
- a huge array of accessories to handle any application.

### MFT 1080

O/N 490 888  
\$834 exc GST  
\$ 917.40 inc GST

The MFT 1080 includes the table with perforated tabletop, foldaway legs, guide rail FS 1080/2, swivel unit, support unit, mitre fence and stop.  
The smaller MFT 800 is also available.

## innovation at its best.

The new DOMINO is a revolutionary joining system, delivering the strength and precision of mortise and tenon joints to frame and panel joining while also eliminating mark-out. The locating pins and depth presets enable consistent, accurate duplication of workpieces - great for batch production!

## joining system DOMINO®

- unique locating pins enable accurate mortise layout without mark-out
- material thickness presets for quick set-up
- DOMINOs (in 5 sizes) suit most applications, including CNC manufacturing
- unique routing action is far safer than other joining methods.
- fast, easy cutter change

Festool was once again pleased to sponsor the **Worldskills Australia National Competition** in Melbourne, May 2006. This competition recognises the top students in their field of expertise and gives them a chance to compete for a place in the **Worldskills International Competition**. Sponsoring the **cabinetmaking, carpentry, and automotive/vehicle** sections, Festool power tool systems enabled the students to produce their best work for the judges' consideration. In the past, Festool-sponsored students have won **international gold**; so we wish all the National winners well at **Worldskills International** in Shizuoka Japan, November 2007. For more information, check out the website: [www.worldskills.org.au](http://www.worldskills.org.au)

Dust extraction: benefits for you and your tools

**FESTOOL**

**voucher**

**FESTOOL**  
Abrasives

# Stop holding your breath...

Festool CT dust extractors have dual HEPA air filters fitted as standard, so they meet Australian workplace health and safety standards.

Dust in the workplace is a serious health hazard, and CT extractors protect your lungs by removing 99.99% of particulate matter as small as 0.3 microns.

The powerful CT motor is remarkably quiet, and the auto-start feature turns suction on and off in sync with whichever Festool tool you connect. Large wheels, a parking brake and the ability to securely transport Systainers also make the CT a handy mobile tool cabinet!

## ...and get better tool performance:

The benefits you get from good dust extraction don't end with improved health and safety; you also get much better performance from your tools. Keeping the cutting area clear of dust minimises heat build-up and reduces wear on your cutters, saw blades and abrasives: improving your results **and** saving you time and money!

No tools needed to change the HEPA or flat filters

Water? No problem with the Level Stop

Mobile and safe, with large wheels and parking brake

Serious capacity! Up to 33 litres (CT 33 E-HEPA)

### Plug it hose

This **anti-static** hose with integrated **Plug it** detachable lead fits all Festool dust extractors and any Festool power tool equipped with Plug it. It gets rid of tangles while ensuring that your tool doesn't get clogged with dust, giving you longer service life + lower operating costs!

Get a Mercedes-Benz SLR McLaren remote-controlled car for **only \$49** when you buy any CT-HEPA dust extractor!

Rubin

Brilliant 2

Titan 2

Also available from Festool

Get the most out of your Festool sander by using Festool abrasives! Made from the highest quality materials, with synthetic aluminium oxide grits and Stickfix adhesive coating, Festool abrasives are long-lasting, strong, heat-resistant and dust-repellent. Which means that you save time and money while achieving superior results.

### Rubin: for WOOD Grits P24-P180

- hard, soft, tropical wood, wood composites
- varnishes, paints, nitro-cellulose paints
- old coats of paint, primed wood

For preliminary and intermediate sanding for joiners, carpenters and painters in the woodworking and furniture industries.

### Brilliant 2: for PAINT Grits P40-P400

- acrylic, nitro-cellulose, priming paints and varnishes
- repair, fine and polyester fillers
- thermoplastic, fibre-reinforced plastics
- undercoats, protective paint, primer

For preliminary, intermediate and final sanding for painters, joiners, furniture makers and interior fitters.

### Titan 2: for AUTOMOTIVE Grits P80-P1500

- fillers - synthetic resin, nitro-cellulose, combination, priming
- primers; water-based, ceramic paints
- two-pack materials
- light/matt sanding of varnish prior to repainting

For preliminary, intermediate and final sanding in paintshops and automotive repair workshops.

**Cristal:** for extreme/aggressive material removal of automotive paints. Grits P40-P120

**Saphir:** for extreme conditions, sanding thick coatings on hard surfaces. Grits P24-P120

**Platin 2:** for finishing mineral materials, high gloss paints, plastics. Grits S400-S4000

**Vlies:** for light sanding, roughening, cleaning, degreasing, matting. Grits A120, A280, S800

## the finest finish of all.

The lightest of its class at 1.8kg, the ETS 150 is certainly no lightweight when it comes to sanding! With 5mm sanding stroke for intermediate/varnish sanding or 3mm sanding stroke for fine sanding. Get both!

### eccentric sander ETS 150

- 150mm dia sanding pad
- 310 W, 6000-10,000 rpm
- sanding brake prevents scratches on initial contact with the workpiece
- soft-start and constant speed via MMC electronics

# Cut corners and curves - easy, safe and accurate

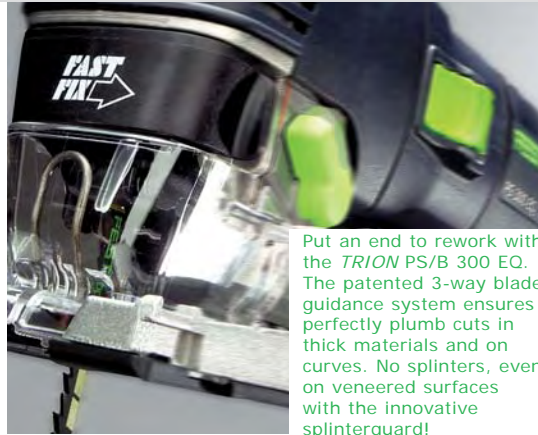

# FESTOOL

like you,  
it hates  
splinters.

Festool's TS 55 EBO and guide rail system provide straight, splinter-free cuts on both sides of the blade. Just line up the guide rail on your scribe line and you'll get perfect cuts every time - even on bevel cuts! The unique plunge action allows fast, safe, accurate cut-outs in benchtops - every time.

## plunge-cut saw TS 55

- 0-55mm (90°)/0-43mm (45°) cutting depth
- 1200 Watts
- safety features include blade brake, softstart, efficient dust extraction
- variable speed to cut a variety of materials
- includes guide rail and Systainer

## pendulum jigsaw TRION®

Put an end to rework with the TRION PS/B 300 EQ. The patented 3-way blade guidance system ensures perfectly plumb cuts in thick materials and on curves. No splinters, even on veneered surfaces with the innovative splinterguard!

- cutting depth:
  - wood 120 mm
  - aluminium 20 mm
  - mild steel 10 mm
- 720 Watts
- variable speed to cut a variety of materials
- save time with Fastfix tool-less blade change
- 4 stage pendulum stroke
- 0-45° bevel range

## router OF 1400

With heaps of innovative features, the OF 1400 is so easy to use, it'll forever change the way you work. Designed for one-handed operation, you'll appreciate its precision depth adjustment and fast rocker & ratchet cutter change.

- 70 mm plunge range
- 1400 Watts
- variable speed and safety brake via MMC electronics
- self-centring, tool-less copy ring change
- Chip deflector and dust extraction hood give up to 99% dust extraction

Lift and carry loads up to 50 kg with ease using the unique GECKO Set. It's also designed to secure the Festool guide rail when cutting or routing. It holds fast to glass & metal sheets, and non-porous panels, (not suitable for plywood or drywall).

## dual suction pad GECKO®

Set includes suction cup holder and saw guide rail adapter

With all the drill bits you need in a purpose-built Systainer - you'll never be short of the right bit for the right job again! This 153-piece set includes CENTROTEC® HSS spiral bits and wood drill bits.

GARANZIA

**3-years**  
peace of mind

All Festool power tools come with 12 months warranty, extended to 3 years by simply completing the 1+2 Warranty Form that comes with every new tool and returning it to Festool within 30 days of the purchase date. Your Festool specialist distributor is happy to assist you with this process. You'll receive a warranty registration certificate that covers repairs, parts and labour for manufacturing defects for 3 years from the date of purchase. Terms and conditions for Festool's 1+2 Warranty, maintenance manual, etc. are included together with each tool; please read all manuals and service information before operating any Festool power tool.
